1. Soldin

On 21 May 18 freight cars of cement, which had arrived on 20 May from Lithuania, were unloaded at Soldin (Mysliborsz), about 45 km. north of Kustrin/Kostrzyn). The cement was loaded onto trucks and taken to Königsberg (Chojna) on the evening of 21 May. On 29 May 13 more cars of cement arrived at Soldin from Kaunas. These were unloaded onto trucks on 4 June and the cement also sent to Königsberg. In both cases Polish army trucks were used, and Polish engineer troops and workers did the loading and unloading.

2. Neudamm

A building material dump has been set up at Neudamm (Dehno, about 20 km. north of Kustrin) since the beginning of May. This is 300 meters northeast of Neudamm station, east of the railroad line to Soldin and south of the road to Massin. It is surrounded by barbed wire and guarded by Polish troops. On 26 May the following were dumped there:

300-350 cubic meters of building wood
100-120 cubic meters of posts (tarred)
Railroad track
Ropes and wire
Wire netting

This dump is being continually filled with material, and material removed from it is removed by Polish troops and taken to Fürstenfelde and Zellin on the Oder.

3. Drossen

Eight large concrete mixers were observed by the station on 4 June at Drossen (Osno, 30 km. ENE of Frankfurt/Oder and 12 km. north of Reppen). These were brought from "Old Poland" in May and were inspected at the start of June by Polish officers who belonged to a Polish engineer unit about 200 strong stationed in Drossen since the middle of May.
